

TT AU White Paper 002 - We started 'MGC in Q1-2015 with the END-GOAL of 110%+ 'green energy'

here is our story...

Our 'old' web-page (MGC^) was live from Q2-2015, we had and have a plan to commission solar farms to 'feed-in' 110% of power used from our EV fleet – here is some info;

TESLA - Not only the best cars on earth - but, also the best company for Earth!!!

<https://www.bbc.com/news/world-australia-42190358>

\$50M-AUD 100-megawatt battery built in 90-day - 'on' from Q1-2018
315MW Wind-farm connected (99x 'wind')
129MW out to 30,000 homes for 1HR

So, for 1,250 homes 24HRs (30k/24) 'power' this would cost \$76 per week, per home over 10-years (\$50m / 1250h / 520w = \$76)

\$25M-AUD 60-megawatt solar - 'on' from Q2-2018

...
60MW out to 16,000 homes for 12HRs a day

So, for 16,000 homes 12HRs per day 'power' this would cost \$1.50 per week (or, 200% as 24HRs = \$3 per week)

per home

over 20-years @ 0% interest (or at 6% PA say \$5 per week)

(\$25m / 16,000h / 1040w = \$1.50)

<https://reneweconomy.com.au/victorias-biggest-solar-farm-connected-to-grid-now-for-new-tesla-battery-80621/>

<http://edifyenergy.com/australias-largest-integrated-battery-with-a-solar-farm-ready-for-summer/>

99x wind = 315MW (3MW ea - or 20x 'wind' for: 'same' as above 1km x 1km Solar 60MW farm --- 5x 60MW = 300MW / 20x 5 wind = 100)
[per Q - 13W - your bill is \$750 - so, '100%' green is UNDER 200% of what you pay now!]

AU Home; 100% wind/solar has a 'per week, per home' cost of UNDER \$100 per week based on the above! TODAY!

--

Your fist question should be:

"good intentions are all 'well and good' – but, if I use 'https://www.teslataxi.com.au' to book my EV hire – what assurances, proof and guarantees do I have/get that this will be 'better than carbon natural'?"

A: Simple – for every 50,000KM driven by cars in our 'group' – we buy MORE 'trees' than 110% of the carbon from an 'ICE' car.

We use;

<https://www.greenfleet.com.au/Individuals/Offset-Emissions>

We provide 'proof' of this by publishing the 'invoice' from our donations here:

www.teslataxi.com.au/carbon

NOTE: The above page also has 'maths' of EV v ICE 'total Carbon' in use and manufacturing...

Our group of owners has selected a 'car club' in QLD as the 'best legal structure' for our operations (Best for group insurance terms and 'tax' implications for our directors and members).

^^To receive the 'prospectus' document that detail the above ROI 'estimate' calculations, email:

pr@theavking.com.au

--

Notes for renters:

\$99 per day is the 'off peak' rate that will be offered under selected 'promo' offers from time to time – the 'going rate' to hire an M3 for 48HRs will be \$180-AUD per 24HR block ('joy rider' day rates from \$239 for 1-day will also be offered, subject to driver screening and "direct owner's" approval – **tyre 'use' for the 3.4s 0~100kmh performance M3 variant is included in this \$239 rate 'wink' 😊**)

- Please use the registration form on; www.teslataxi.com.au to receive an invitation to rent or an 'offer to join'(if you want to add your Tesla to our fleet).

International service notes:

We will open the: US, UK/EU, China and Japan TT operations sites from 15/06/2019

(Please register now on; www.teslataxi.com.au to receive notice when we are active in your region – mention your location in the 'message' section of your registration form submission)
